

ASHISH PIMPALSHENDE

Software Engineer | Full-Stack Developer

Nagpur, Maharashtra | +91 9975488932 | ash.pimpalshende@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer (MERN) with hands-on experience building and deploying AI-powered web applications end-to-end from RESTful API design and JWT-secured auth to Redis caching and Docker-based deployment on Vercel/Render. Comfortable owning a feature from database schema to production, with a focus on performance and clean architecture.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication, OAuth 2.0

Databases & Cache: MongoDB Atlas, Mongoose ODM, MySQL, Redis

DevOps & Cloud: Git, GitHub, Docker, Docker Compose, CI/CD, Vercel, Render, AWS EC2

AI & LLM: OpenAI API, Gemini API, RAG

Tools & Testing: Postman, Jest, npm/Yarn, ESLint, Prettier, Webpack/Vite, Cloudinary

Concepts: DSA, OOPs, Authentication & Authorization, Database Design, Agile, Scrum, Microservices, System Design

PROJECTS

FlowZen | AI-Powered Order Management Platform | [GitHub](#) | [Live](#)

May 2026 – June 2026

Tech Stack: React.js • Node.js • Express.js • MongoDB • Redis • Gemini API • Docker • GitHub Actions • Cloudinary • PWA

- Automated order processing by converting WhatsApp messages, handwritten notes, and screenshots into structured packing checklists using Gemini API, reducing manual order processing effort by 80%.
- Load-tested backend with k6, sustaining 50 concurrent users at ~107ms average response time (p95: 141ms) across 418+ requests with zero failed requests.
- Implemented rate-limiting and JWT middleware, verified under load testing to correctly block brute-force login attempts (HTTP 429) while maintaining 100% uptime on health-check endpoints.
- Built 20+ production REST APIs with Redis caching, Docker containerization, and GitHub Actions CI/CD, reducing API response time by 35% through query indexing and schema optimization.

UrbanRide | Full-Stack Vehicle Rental Platform | [GitHub](#) | [Live](#)

Jan 2026 – Mar 2026

Tech Stack: React.js • Node.js • Express.js • MongoDB Atlas • JWT • Tailwind CSS • Vercel • Render

- Built a multi-role vehicle rental platform (Admin, Agent, Customer) with secure booking, vehicle lifecycle tracking, and role-based trip management — architected to cleanly separate permissions across three distinct user types.
- Implemented JWT Authentication and Role-Based Access Control (RBAC) middleware, enforcing endpoint-level authorization so each role (Admin/Agent/Customer) only accesses permitted actions.
- Optimized MongoDB queries (indexing, lean queries) and React rendering (memoization, lazy loading) — reduced measured API response time by 25% based on internal before/after testing.
- Deployed on Vercel (frontend) and Render (backend) with MongoDB Atlas and GitHub-integrated CI/CD, enabling automatic redeployment on every push to main.

EDUCATION

B. Tech, Artificial Intelligence & Data Science

Jul 2022 – May 2026

Priyadarshini College of Engineering, Nagpur | CGPA: 7.05/10

Higher Secondary School (12th), Information Technology

Apr 2021 – Mar 2022

Funde Science & I.T. Junior College, Gondia | Percentage: 83.17%

CERTIFICATIONS

Cohort 2.0 - AI-Powered Full-Stack Development (Generative AI & DSA)

June 2026

— Sheryians Coding School

Meta Front-End Developer Professional Certificate

Apr 2026

— Meta | Coursera
